

VSxF-2/-3/-4

SMALL LINEAR VALVES PN16

FOR MODULATING AND ON/OFF-CONTROL

PRODUCT DATA

VSxF-2

VSxF-3

VSxF-4

GENERAL

These small linear valves are used in combination with small electric linear valve actuators and thermoelectric actuators for the control of hot and/or chilled water for fan coil units and small reheaters/recoolers in electric/electronic temperature control systems.

FEATURES

- Small size allows installation where space is limited
- Long stroke results in a high quality characteristic
- Soft seat provides low leakage rate and high rangeability
- High close-off pressure
- Wide standardized range of k_{VS} values
- Reduced k_{VS} values in the bypass to facilitate hydronic balancing
- Dezincification-resistant yellow brass
- Range of fittings available for different connections (soldered, threaded)
- Models with integrated snap-on linkage for MT-series thermal actuators
- Standardized opening direction across the complete VS portfolio (valve stem down to open A-B / A-AB)
- Valve diverting usage capability (depending on model)

SPECIFICATIONS

Models	Two-way VSxF-2 Three-way VSxF-3 Three-way with bypass VSxF-4
Operation	Two-way; three-way stem up to close, port A to B / AB
Nominal pressure rating	PN16
Capacity index (k_{VS})	see tables on pages 2, 3, and 4
Close-off pressures	see tables on pages 2, 3, and 4
Leakage rate	$\leq 0.02\%$ of k_{VS}
Port connection	flat sealing connections in standard sizes
Valve body	
Material	Brass
Size	DN15 (1/2"), DN20 (3/4"), DN25 (1-1/4")
Trim	
Stem	Stainless steel
Plug	Brass
Suitable medium	Water, with max. 50% glycol
Controlled water temp.	2...120 °C
Modulating valves	
VSMF-xxx	
Stroke	6.5 mm
Dimensions	see Fig. 4, Fig. 5, and Fig. 6 on page 6
Characteristic	2-way: modified equal % 3-way: A-AB modified equal %; B-AB linear
ON/OFF valves	
VSOFF-xxx	
Stroke	2.5 mm
Dimensions	see Fig. 4, Fig. 5, and Fig. 6 on page 6

[†]leakage rate B-AB port ≤ 0.5%

OPERATION

In the case of the two-way valve, the three-way valve, and the three-way valve with bypass, the built-in spring produces a closing force on the A-B / A-AB ports.

The valves are supplied with a screwed-on adjustment cap for manual operation and for protection of the stem. If it should become necessary to flush the system, the valve can be opened between approx. 50% and 75% of the rated k_{VS} with the protection cap attached or fully opened via a connected actuator.

Typical Operation

All types of valves must be mounted in the return flow. If the Δp -values exceed 300 kPa, attention should be paid to the development of noise.

Two-Way Valves

Direction of flow always from port A to port B

Port B: Outlet

Fig. 1. Two-way valve operation

Three-Way Valves

These valves are preferably used as mixing valves, this means:

Port AB: Total flow outlet
 Port A: Controlled flow inlet
 Port B: Bypass inlet

Fig. 2. Three-way valve operation

Three-Way Valves with Bypass

These valves simplify the installation, which is depending on the layout of the pipework, as the bypass pipe is part of the valve. The information for the normal three-way valves is also valid for this type.

Fig. 3. Three-way valve with bypass

MOUNTING

When installing the valve care must be taken that the flow direction is correct (see section "Typical Operation"). The valve must not be mounted with the stem pointing downward.

The adjustment cap must be removed from the valve only when the actuator is fitted. The valve should be installed as stress-free as possible with a tightening torque of 25 to 30 Nm.

The valve is supplied complete with mounting instructions. The water quality must meet VDI 2035 requirements.

NOTE: Mount the actuator by hand, only. Do not use a tool, as this could result in damage.

MAINTENANCE / SPARE PARTS

The valves do not require any maintenance.

In case of failure or leakage, the valve must be replaced. No spare parts for the valve or sealing are available.

DISPOSAL

Statutory regulations and/or environmental protection considerations may require special handling in disposing of the valves.

ACCESSORIES

Valves VSxF-2 need two connection sets, valves VSxF-3 need three connection sets, and valves VSxF-4 need four connection sets.

connection	pipe size	DN	order number	connection set		description
Soldering	12 mm 15 mm	15 20	AC-15FS AC-20FS			Consisting of 1 union nut, 1 solder bush, and 1 gasket
External Thread	R3/8" R1/2" R1"	15 20 25	AC-15FT AC-20FT ACS-25T			Consisting of 1 union nut, 1 tailpiece, and 1 gasket
